[linkedin.com/in/joner-de-silva-861575203](https://www.linkedin.com/in/joner-de-silva-861575203)

Versatile Full Stack Developer, with a strong foundation in AI and software development. Experienced in building intelligent web applications, integrating machine learning workflows, and seamlessly connecting AI APIs from platforms such as Groq, Hugging Face, and OpenAI into production-ready web apps. Skilled in working with modern AI tools such as Claude Code, Cursor, Warp, LangChain, and Ollama. Equally effective in team-based and independent projects, I'm driven by the challenge of solving real-world problems through innovative and scalable technology solutions.

TECHNOLOGIES

- **Programming Languages:** Python, JavaScript, TypeScript, Ruby
- **Web Development:** Vue.js, React.js, Next.js, Node.js, Express.js, Ruby on Rails, GraphQL, FastAPI, REST APIs
- **Databases:** MySQL, PostgreSQL, SQLite, MongoDB, Neon
- **Cloud & DevOps:** Google Cloud Platform (GCP, Vercel, Render, Git, GitHub)
- **Cybersecurity & Networking:** Qualys VMDR, Palo Alto Networks, CISCO CCNA, OSINT tools
- **Tools & Platforms:** Docker, Cursor, Claude Code, Warp, Postman, GitHub Actions, n8n, Zapier, Stripe
- **AI / Machine Learning:** TensorFlow, PyTorch, Scikit-learn, Hugging Face, LangChain, OpenAI API, Ollama, Groq API

EDUCATION - Batangas State University TNEU – Alangilan | Batangas City Bachelor of Science in Computer Science [Consistent Dean's Lister]

EXPERIENCE

- **Intern at Pearl Energy Philippines Operating Inc.** - At Pearl Energy Philippines Operating Inc., I maintained and troubleshooted internal database systems, including red tagging and ticketing tools. I also created cybersecurity advisories to promote safe practices within the company.
- **AI + Web Developer at ChatGenie PH**
 - Developed and integrated a **multi-agent AI system** for customer service automation, enhancing response efficiency and user engagement.
 - Utilized **Ruby on Rails, GraphQL**, and **Vue.js** to design and deploy scalable web features supporting the AI system.
- **Full Stack Developer at Reelr Sports**
 - Built and optimized **RESTful APIs** using **.NET (C#)** and integrated them with a **TypeScript + Angular** frontend.
 - Improved system performance and maintainability through clean architecture and efficient API-frontend communication.

NOTABLE PROJECTS

- **InFrame** - AI-powered LinkedIn content creation tool that generates professional captions, images, and platform-accurate post previews, allowing creators to see how posts will look before publishing. <https://postgen-ai-two.vercel.app>
- **Tuberculosis Early Detection through Cough Analysis Using Machine Learning - Best Paper, ASCENT 2025 (People Track) & Best Thesis Award** A machine-learning framework that analyzes cough sound recordings to screen for tuberculosis noninvasively.
- **CareerLaunch AI** - get AI-powered feedback, personalized cover letters tailored to the job, and mock interview questions to help you practice and stand out, powered by groq. <https://career-launch-ai.vercel.app>
- **ADShield AI** - Advanced AI text, image, and documents analysis for phishing & scam detection with real-time threat assessment and comprehensive security reporting. <https://adshield-frontend.vercel.app>
- **RA 10173 Compliance Checker** - A web-app that helps organizations comply with the Data Privacy Act of 2012 in the Philippines, providing resources and tools for data protection. <https://legislation.vercel.app>
- **Repostr** - AI-powered content repurposer that transforms long-form content into multiple platform-ready formats, helping creators maximize reach and streamline multi-platform strategies. <https://repostr.vercel.app>
- **N8N Video Automation** – Created a workflow for automating YouTube Shorts/Tiktok/Instagram videos, all running locally with Docker using Groq API, AWS S3, Minio, Kokoro TTS, Comfy UI, Zapier, and Buffer.

CERTIFICATIONS

- **Certified in Cybersecurity** | ISC2 - Acquired skills in mitigating and managing cybersecurity incidents and earned fundamental principles of cybersecurity.
- **Open-source Intelligence** | Basel Institute on Governance - Acquired expertise in open-source intelligence (OSINT) techniques and methodologies.
- **Security Operations Fundamentals** | Palo Alto Networks - Covered network security, threat intelligence, incident response, and cybersecurity best practices.
- **Google Cloud Computing Foundations Certificate** - Completed foundational training on cloud computing concepts, including core Google Cloud services, cloud infrastructure, security, and best practices for deploying and managing applications in the cloud.
- **Qualys – Vulnerability Management Detection and Response** - Learned how to identify, prioritize, and remediate vulnerabilities across an organization's digital infrastructure to enhance its overall security posture.
- **CS50 – Introduction to Programming with Python** - Provided foundational knowledge and practical skills in Python programming, covering core concepts such as syntax, data structures, algorithms, and problem-solving techniques.
- **CCNAv7: Introduction to Networks** | CISCO - Developed skills in network configuration, troubleshooting, and security fundamentals.
- **AWS Educate Machine Learning Foundations** - Completed foundational training on machine learning concepts.
- **AWS Educate – Machine Learning: DeepRacer** - Completed hands-on training focused on reinforcement learning using AWS DeepRacer. Gained experience in training, evaluating, and deploying autonomous driving models in a virtual racing environment.
- **Elements of AI** — University of Helsinki & MinnaLearn - Completed an introductory course covering the basics of artificial intelligence, including its history, applications, machine learning principles, and ethical considerations.
